EACH TASK CARRIES 1 POINT

SUBMIT AS MANY TASKS AS POSSIBLE BY 12PM 29TH APRIL, 2021

LEARN... BUILD... SHARE...

We all know how difficult it is to learn technology as a beginner, but all thanks to community members for their beginner-friendly tutorials. Choose any tutorial, construct something and display your work with all community members.

BRING A CHAT BOT TO LIFE!

We all use bots like Siri, Cortana, Alexa or Whatsapp / Telegram / Discord bots in our day to day lives. Let's dive in and build a chatbot like Discord / slack bot or any other chatbot you wish.

FIT STEP GO!

Being fit amid this pandemic has become really crucial! There is nothing better than building a Fitness App by using different API like Garmin or FitBit to examine activity or use Strava API to track down miles you've walked.

## ALL YOU NEED IS MAPS

What to take your project to the next level? We've got your back! Take a project you've already created or create a fresh new one and add GPS or other map technology.

## BOOTSTRAP FOR EVERYONE

Wasting a lot of time writing code for a Web Development Project? Use the bootstrap framework in your project to save time and easily make it responsive too!
