EACH TASK CARRIES 1 POINT

SUBMIT AS MANY TASKS AS POSSIBLE BY 12PM 27TH APRIL, 2021

### KICKSTART YOUR GITHUB PAGE

Why to keep the amazing hacks you created to yourself, create your very own personal GitHub page to showcase all your work and let people know of your outstanding talent. If your GitHub page already exists then update it with your new cool work, just edit, push and your changes are done.

### A NEW LANGUAGE IS JUST A 'HELLO WORLD' AWAY...

There is no better way to start your journey with an enthusiastic greet to everyone and what a great idea to step things up to the next level by greeting all in a new language. So step out of your comfort zone, buckle up and say 'Hello, World!' in any programming language that you've never used before. Not sure on how to start? Just reach out for the online tutorials!

## IT'S ALL ABOUT THE PERFECT LAYOUT

Have you ever come across a website which seriously needed to change its layout? How frustrating it is to see a bad layout and what a relief it can be to change the layout to make it flawless and attractive. Here you go then, just pick any website of your choice and imagine a new layout for it. You can draw it out, wireframe it or go a step ahead by writing HTML/CSS if you'd like.

## BAS BAJNA CHAHIYE GAANA

Listening to music while working improves your concentration and your efficiency. Almost all of us actually swear by it and put on our headphones while working to crack that hard problem. When music has given us so much, why don't we try going reverse on this cycle. Let's try doing something for the music. Build a Music API and submit your hack.

## SORT IT OUT!

When it comes to computer science, it's impossible to miss out on the classic problem, Sorting. So write a code to sort a list. Try to keep it basic if you are new to coding and in case you ace it you can try doing the task in a new language or without the support of search engines.
